## The Petro Vend PV100™ Fuel Control System

OPW Fuel Management Systems proudly introduces the Petro Vend 100™ (PV100) Fuel Control System – a stand-alone, pedestal-mounted system for small or mid-sized fleet-fueling sites that require one- or two-hose control.

The OPW Petro Vend 100™ is the ideal solution for unattended fueling for small or mid-sized fleets. As a “turnkey system,” the unit is designed for quick and easy installation. It ships ready-to-use with 50 pre-configured users and requires only power, and hose-control line connections in order to initiate system operation. The PV100™ stores dispensed fuel amounts as card- and pump-specific totals, which can be viewed on the display or retrieved with an external USB flash drive for transfer to local computer. A great solution for small fleets of a single department, at a very competitive price and pre-configured for installation with P4-Series Dispensers. Available with separate pedestal, or “wing-Bracket, for mounting on dispenser side column, outside of the hazardous area.

**Petro Vend 100™** Controls up to two hoses

### Features

User selectable PINs, from 3 to 6 digits in length, allowing only authorized users to access fuel

Hose-based quantity restrictions

- Dual, manual, pump override control enables pump relays and the recording of dispensed-fuel volumes during a specific time
- Monochrome graphic display
- Optional dual-head magnetic card reader
- Optional HID proximity key-fob reader **(available this Spring)**
- Optional USB flash drive for transaction storage
- Allows you to adjust programming parameters, view card and pump totals, and transfer all data to a USB flash drive via Manager Card access in on-screen manager mode

### Benefits

- Turnkey system with easy installation
- Cost effective for small to mid-sized fleet-fueling operations
- Field upgradable software
- Track and report fueling by card or pump totals (specific transaction data optional). See screen visuals below
- Menu-driven configuration takes place at the terminal, eliminating the need for PC-required software
- Saves the expense of trenching and pulling wires for serial communications
- 

### Memory

- Standard memory allows tracking of up to 50 proprietary cards
- Expandable to 250 proprietary cards
- Stores virtually unlimited number of transactions on USB flash drive (optional)
